Maitland, Florida 32751

Dear Ben:

I am so happy to hear you are still alive and kicking and receiving appropriate honors. There are few who have done more than you to extend the knowledge and use of surgery and benefit the poor patient..

But I want to remind you of some adventures that may or may not have been published. For instance, I believe it was you who, through the Committee on Trauma pushed the design of ambulances to the homely box they are now instead of the sleek converted Cadillac they used to be. It certainly was you who kept those meetings of the Committee tolerable.

I am sure the myriad contributions you have made to education, to surgery, and to the maintenance of humor in the midst of a busy surgical world will be repeated many times.

I want you to know how much I have enjoyed your friendship, your wit and your wisdom through the many years since we were children. I am happy to add my heartfelt Good wishes.

I regret Nancy and I cannot attend; we are pretty well restricted to very short trips and those ambulatory phases conducted by wheel chair.

BUT WE'LL BE THERE IN SPIRIT!

Nancy and Wiley Barker
